Professional Summary

Information Technology student with hands-on experience in software development through internships and academic projects. Proficient in developing applications, working with backend systems, testing software, and resolving technical issues. Strong understanding of programming fundamentals, software engineering concepts, version control, and application development workflows. A quick learner with strong analytical and problem-solving abilities, seeking opportunities to contribute to impactful software products while growing as a software engineer.

Education

Bachelor of Technology, Information Technology

Chandubhai S. Patel Institute of Technology (Charusat)
current CGPA: 7.41

Expected May 2027

Diploma in Information Technology

Government Polytechnic Ahmedabad, Gujarat
CGPA: 7.56/10.00

2024

St. Xavier's CMI Public School, CBSE

10th Grade: 80.2%

2021

Technical Skills

Programming Languages: Java, Python, C#

Frameworks & Tools: Spring Boot, JavaFX, Unity Engine, .NET

Operating Systems: Windows, Red Hat Linux (Kali, CentOS)

Security & AI: Prompt Engineering, Secure Coding Practices

Platforms: Firebase, Git, GitHub, Facebook OAuth

Certifications

Red Hat System Administration I & II (RH124 & RH134)

Red Hat Academy — Course Completion

2026

Professional Experience

Airports Authority of India — Software Intern

July 2023 – Aug 2023

- Designed and implemented “BA-Project,” a .NET Windows application for breath-analyzer data management.
- Developed UI using WinForms and integrated Access database.
- Conducted software testing, debugging, and issue resolution to improve application performance and stability.

Abhedya Tech Services — Backend Intern

June 2025 – July 2025

- Worked on Spring Boot project; configured RESTful APIs and database models.
- Implemented Auth0 authentication and learned server-side security practices.

Projects

SentinelX

2026

- Developing a Windows process monitoring and threat detection system using C++, Win32 API, WPF, and C#.
- Implemented hidden process detection, digital signature verification, and heuristic-based risk scoring.

CypherChain AI

2025

- Developing an AI-based supply-chain vulnerability scanner using Python.
- Implementing automated threat detection and secure data pipelines.

Dots and Boxes (JavaFX)

2024–25

- Developed a multiplayer game using JavaFX, Firebase backend, and Facebook OAuth.
- Implemented real-time synchronization and client-server communication.

BA-Project (AAI Internship)

2023

- Built a .NET application to manage breath-analyzer testing for airport employees.
- Integrated Access database and automated random employee selection.
